Company profile and business card

SOLVENT-BASED INK SYSTEMS

IMAGINE... INK THAT STANDS APART

Chemiprint's solvent-based ink systems include an extensive range of products for surface printing and lamination based on a variety of mono and high performance technologies. The company's superior solvent-based inks offer exceptional printability, high heat resistance, and excellent adhesion to numerous substrates. A professional team of dedicated chemists and technicians ensure the perfect color, consistency and chemical balance for the application's functionality and characteristics.

IMAGINE... INK FOR MULTIPLE APPLICATIONS

Corbography

- **UV based inks** - Intrinsically emulsions with a range of fast-dry, long-term heat setting and UV cure.
- **Polyester-based inks** - Offer high-end results for surface printing with excellent adhesion on numerous substrates.
- **High quality process jobs (UV based inks)** - Features high-speed print with a great printability, low TVI and great and superior adhesion on a wide variety of substrates. Suitable for very fine halftones.

Lamination

- **UV based inks** - Suitable for a variety of common substrate such as BOPP, OPP, Chemically treated PET, PE, Modified film and more.
- **Pure UV based inks** - Can be used for printing on early existing substrate with maximum efficiency and bonding strength for high-end decorative substrate processes.

NEWPRINT INK SERIES

Range of tailor-made inks and customized printing solutions:

- **Newprint FHL** for general use for heat resistant surface printing.
- **Newprint DP** for deep freeze applications such as frozen vegetables, meat, dairy products etc.
- **Newprint LH** with built-in resistance and high light stability, enabling the use of the same inks for multiple applications.
- **Newprint FTD** for high quality process jobs.
- **Newprint LMM** for lamination applications with very good adhesion on different substrates such as Polyethylene (HD, LD, LLD, MLLD, Polypropylene (BOPP, OPP, chemically treated PET and more).
- **Newprint PL** for heat resistant and laminator printing with high contrast.
- **Polychem polyamide-based ink system** for corbography.

Service & Support

Chemiprint's expert technical team and support systems can tailor inks for every application and recommend inks to meet any specific application and printing conditions.

WATER-BASED INK SYSTEMS

IMAGINE... INK THAT STANDS APART

Chemiprint's superior water-based inks offer excellent printability and re-solubility, high gloss and superior color strength. The company has captured approximately 70% market share for water-based inks in Israel, with a manufacturing capacity of 2,000 tons per year. The company's water-based inks are produced with the most advanced automatic dispensing systems, using 37 ingredient stations and a dual dispensing head. A dedicated team of first-class chemists and technicians is on hand to ensure that the product formulation has the perfect color, consistency and chemical balance for the application's functionality and characteristics.

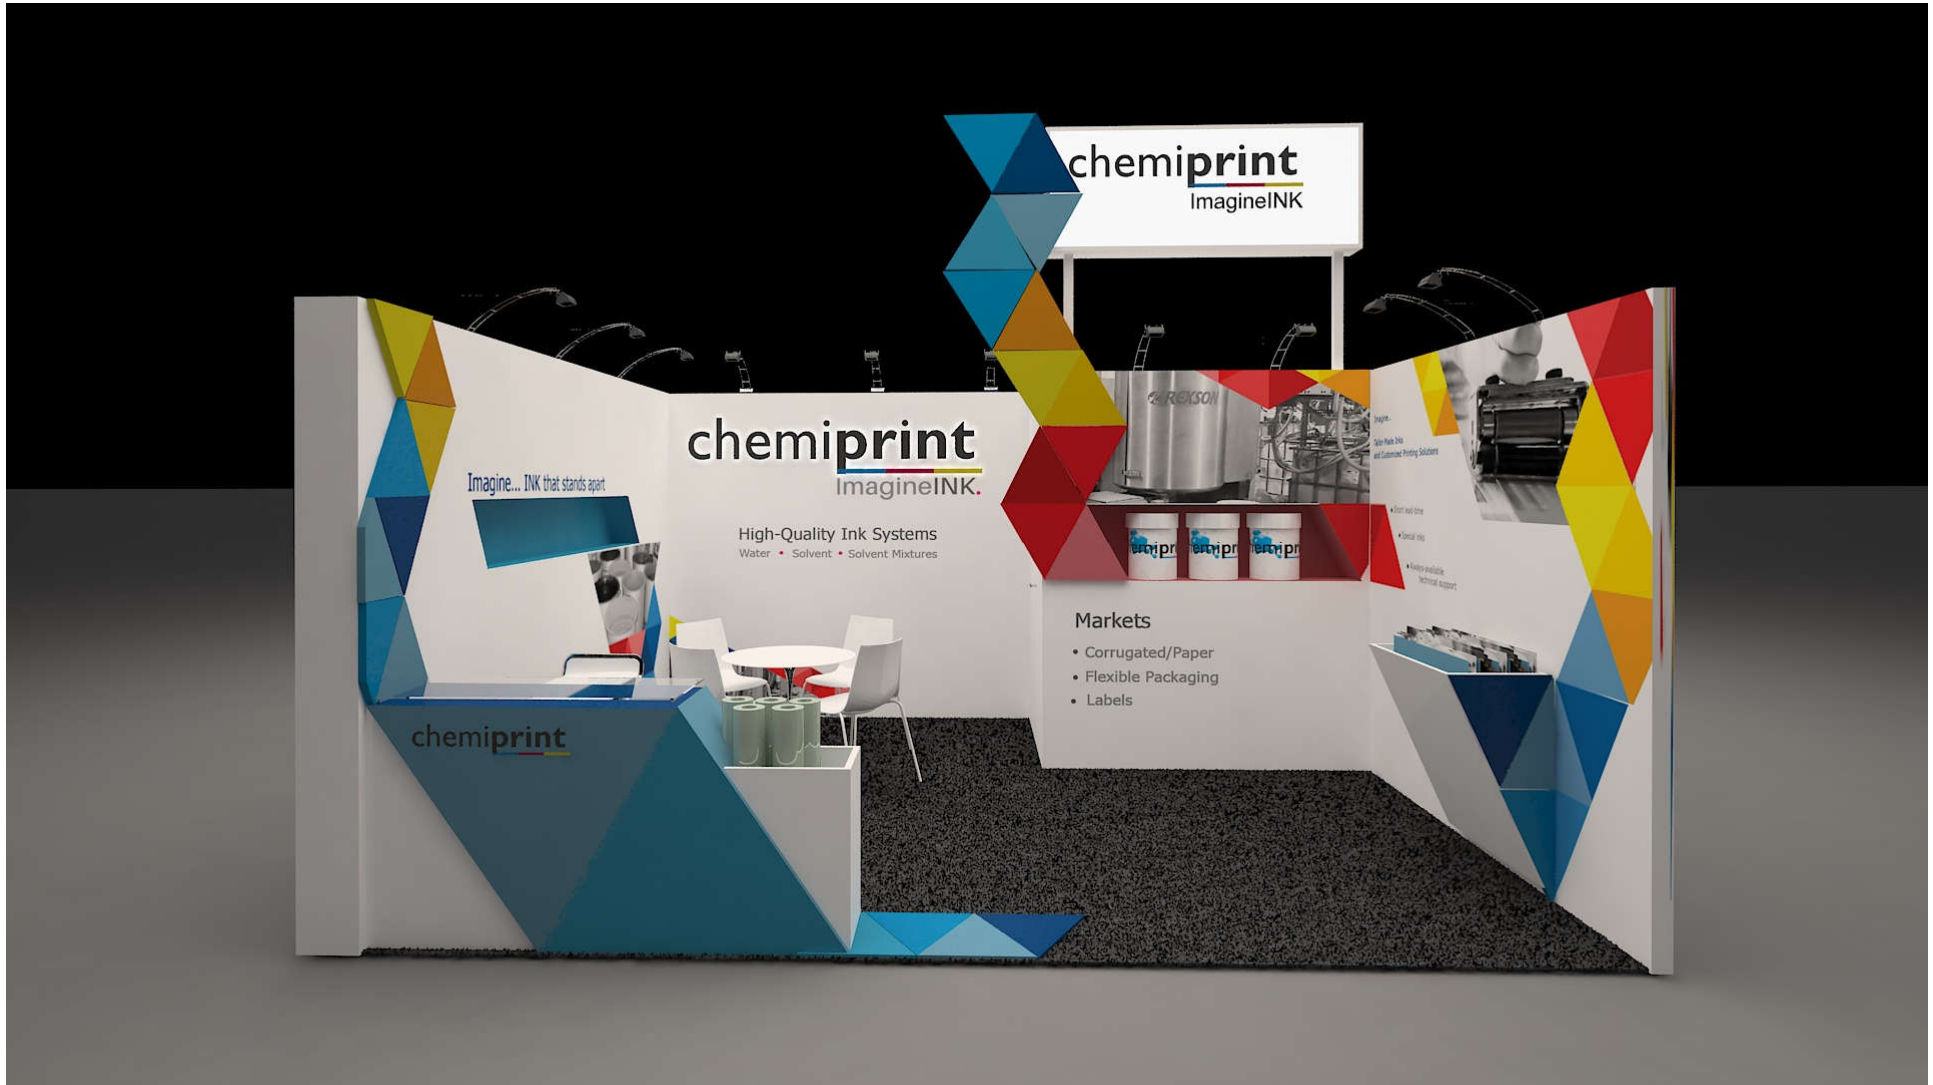

MYPRINT INK SERIES

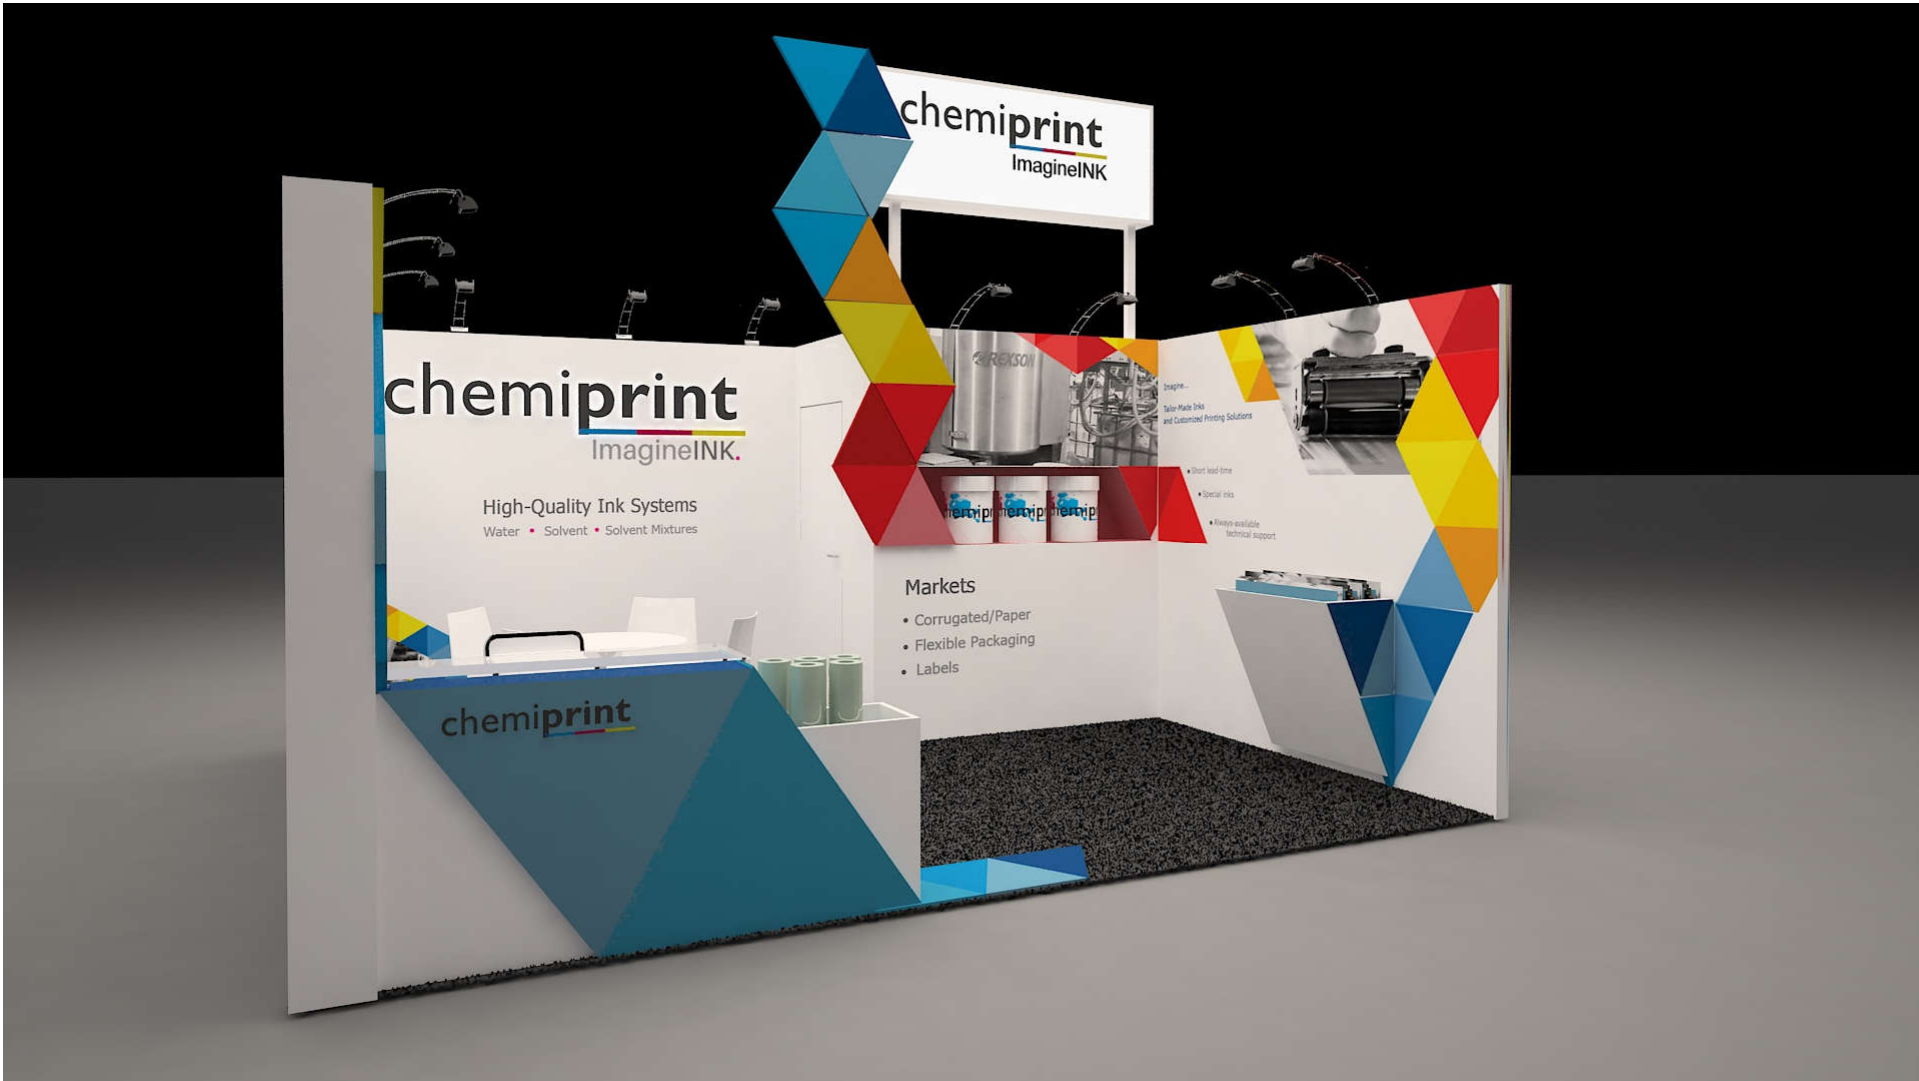

A range of tailor-made inks and customized printing solutions:

- **MyPrint Universal** for high color strength and excellent printability on white or brown corrugated boards.
- **MyPrint Labels** for high-speed printing of both coated and uncoated paper labels.
- **MyPrint Gloss** utilizes fast-drying high-gloss inks for both coated and uncoated papers.
- **MyPrint HD** for high-quality process jobs requiring robust color strength.
- **MyPrint Films** designed to print on common films such as OPP, BOPP, PE, PET and more!
- **Chemipress** water-based pigment concentrates and different technological variants to produce flexo inks for all kinds of ink dispensing systems.
