

YTS Advantages

- > Highly specialized design, engineering and integration capabilities
- > Industry pioneer with an established track record of more than 28 years
- > Professional team with real-world security experience
- > A recognized leader within the HLS, security, law enforcement, intelligence, military communities

Other Business Areas

- > Technical Surveillance Counter Measures (TSCM) – For the wiretapping, detection, and monitoring field, YTS creates protected areas safeguarded against illicit information theft, cyber and corporate espionage.
- > Critical facilities and infrastructure protection
- > Security training and surveys

Trust Your Mission to the Experts

YTS (Your Total Security) focuses on the design, engineering and integration of **special mission vehicles that are completely tailored to their customer's tactical and strategic requirements.**

For over 28 years, YTS has worked with the leading HLS, law enforcement, intelligence, security and military agencies around the world to provide the most innovative and effective solutions in an increasingly complex environment. YTS has a proven track record of quality, discretion and superb customer service.

Professional team with real-world experience

Leveraging years of extensive on-the-ground experience in Israeli intelligence and security agencies, and harnessing an in-depth understanding of the worldwide security market, the **YTS team delivers vehicles that are uniquely suited to the most demanding and complex security missions.**

Broad range of professional capabilities –

The YTS team brings a wide range of benefits and advantages into every solution that they offer. YTS vehicles are designed and built to the most demanding quality standards, with extreme attention to detail, including ergonomics, comfort and mobility. They provide complete versatility, a broad knowledge of planning and integration, insights into automation and MMI, as well as mechanical and electrical engineering expertise.

Relevant for a wide range of scenarios –

As a manufacturer and integrator of special mission vehicles, YTS' services and solutions range from highly covert operations to complex and varied security, reconnaissance and intelligence missions.

Although YTS vehicles cannot be distinguished from other cars on the road, they are fitted with sophisticated intelligence and C2 equipment that enables them to effectively execute their missions without arousing suspicion.

Deployed across the globe with a proven track record –

YTS is proud of its long-standing relationship with prestigious Tier-1 customers, in both the government and HLS sectors. Selected customers in Israel include: Israel Ministry of Defense, Israel Defense Force, Israel Police and Border Control, Elbit Systems, Verint Systems, Israel Aircraft Industries, Rafael Advanced Defense Systems, Intel and Motorola.

Main Business Areas

Special Mission Vehicles:

- > **Covert, Multi-purpose Intelligence** – The YTS covert, multi-purpose intelligence vehicle enables the streamlined execution of the most highly-complex surveillance missions.
- > **Observation and Reconnaissance** – For comprehensive visual observation operations, the YTS vehicle serves as a superb mobile observation post for long-range coverage. The vehicle effectively supports real-time cellular and/or satellite dissemination to remote HQ or monitoring units.
- > **Command, Control, Communication (C3) & Surveillance** – Operating as a dual-purpose information gathering and command center, the vehicles are equipped with sophisticated audio and visual intelligence equipment, as well as a full range of C2 equipment.
- > **VIP Jammer** – The YTS VIP Jammer is equipped with state-of-the-art technology that transmits unique noise signals to create a firewall – effectively neutralizing and jamming wireless transmissions for remote explosive activation.
- > **CSI** – The YTS Mobile Cyber Forensic Lab is fully-equipped for real-time retrieving, archiving and analyzing data stored on digital devices at any location.

All of the vehicle's equipment can be manufactured in YTS facilities, and then delivered and installed on-site.
